

INDUSTRIAL HEATING TO WORLDWIDE STANDARDS

DELTA-T

Delta-T: Your Trusted Partner in Heat Transfer Solutions

Backed by over fifty years of industry experience, Delta-T offers a comprehensive range of high-performance industrial heating systems designed to meet the most demanding requirements across diverse industries, and based on International Standards such as ASME Code or European PED.

Whatever your heat transfer challenge, Delta-T has the expertise and technology to deliver superior performance.

Our product portfolio includes:

- **Steam Boilers**
- **Hot Water Boilers**
- **Thermal Fluid Heaters**
- **Hot Water Storage Tanks**
- **Flexible Energy Sources:** Fuel Fired, Gas Fired or Electric Heated Equipment available and tailored to the required energy supply.
- **Complete Solutions:** Boiler Room Auxiliaries for flexible and integrated solutions.

Tailored Solutions for Diverse Industries

Delta-T industrial boilers and heaters are trusted for their reliability, energy efficiency, and performance in critical applications across three key sectors:

Hotels:

Hot water supply for guest rooms, kitchens, and spas.

Energy-efficient solutions for laundry services and swimming pools.

Hospitals:

Sterilization processes and hygienic hot water systems.

Consistent heating for patient comfort and operational efficiency.

Process Industry:

Solutions for manufacturing, food processing, and chemical production.

Reliable heat for critical industrial processes.

Whether you're running a luxury hotel, a healthcare facility, or a manufacturing plant, Delta-T delivers the heating solutions you need to keep operations running smoothly and efficiently.
